

Lalit Gaikwad

React Native Developer — Full Stack Engineer — 4 Years Experience

9730371747 | lalitgaikwad274@gmail.com | LinkedIn | GitHub

TECHNICAL SKILLS

Frontend: React Native, React.js, TypeScript, Redux Toolkit, React Navigation

Backend: FastAPI, Node.js, Express.js

AI & Generative AI: OpenAI GPT-4o, OpenAI Whisper, LLM Integration, Prompt Engineering, Speech-to-Text (STT)

Databases: PostgreSQL, MongoDB

Mobile Development: Native Modules, Deep Linking, Push Notifications, Async Storage, Background Tasks

React Native Concepts: Hermes, Fabric, TurboModules, JSI, Performance Optimization, Memory Leak Detection

Testing: Jest

Tools: Git, Docker, Postman, Android Studio, Kibana, Tealium

Other: Firebase, REST APIs, WebRTC, CI/CD, Agile Methodology, SDK Integration, Text-to-Speech (TTS)

EXPERIENCE

React Native Engineer

Aug 2022 – Present

IProgrammer Solutions Pvt. Ltd., Pune

- Built and enhanced cross-platform mobile applications using React Native, improving application performance and user experience.
- Integrated 15+ REST APIs and developed reusable UI components, contributing to a 20% increase in user engagement.
- Built and integrated an AI-powered conversational assistant using LLMs to assist users with recharge flows, FAQs, and customer support, including Text-to-Speech (TTS) for voice responses.
- Improved recharge page performance by 30% through optimized caching strategies using Redux Toolkit and Async Storage, reducing redundant API calls and improving application responsiveness.
- Engineered advanced filtering, deep linking, and push notification features to enhance user experience.
- Debugged and resolved production crashes using Kibana logs, improving application stability and reliability.
- Optimized React Native applications using FlatList optimization, memoization, and memory leak detection techniques.
- Collaborated with cross-functional Agile teams to design, develop, test, and deploy scalable mobile applications.
- Implemented secure encryption and decryption techniques for protecting sensitive customer information.
- Participated in code reviews and maintained high code quality standards following industry best practices.

Software Engineer

Mar 2022 – Aug 2022

Bluepineapple, Pune

- Contributed to a video conferencing platform enabling peer-to-peer communication using WebRTC.
- Developed screen sharing, screen recording, and chat functionality for real-time collaboration.
- Worked with Python-based WebSocket channels for backend communication.

PROJECTS

Vodafone Idea (Vi) App

React Native, Redux Toolkit

- Developed and optimized features for prepaid and postpaid user journeys in the React Native application.

- Integrated third-party services including Asianet to improve customer experience and service accessibility.
- Integrated an AI-powered recharge assistant for conversational support, recharge recommendations, and customer queries.
- Resolved critical production crashes using Kibana logs and performance debugging tools.
- Improved API performance, caching, and reliability for better application responsiveness.
- Collaborated with Agile teams during sprint planning, feature implementation, and production deployments.

MarineMind – Marine Job Finder Platform

React Native, REST APIs

- Built a cross-platform React Native application for marine job discovery and filtering.
- Integrated role-based navigation and REST API services for real-time job updates.
- Optimized search and filtering functionality for improved user experience and application performance.

AI Meeting Notes App React Native, TypeScript, FastAPI, OpenAI Whisper, OpenAI GPT-4o, PostgreSQL

- Built a cross-platform React Native application to record, upload, and manage meeting recordings with AI-powered note generation.
- Integrated OpenAI Whisper for accurate speech-to-text transcription of meeting audio.
- Developed a FastAPI backend with asynchronous REST APIs, JWT authentication, and PostgreSQL for secure meeting and user management.
- Integrated OpenAI GPT-4o to automatically generate meeting summaries, key discussion points, and actionable tasks from meeting transcripts.
- Implemented audio upload, transcript viewing, AI-generated summaries, and searchable meeting history within the mobile application.
- Designed a scalable backend architecture using SQLAlchemy, Pydantic, and modular APIs following production-ready development practices.

EDUCATION

Savitribai Phule Pune University (SPPU)

2020 – 2022

Master of Computer Science

ACHIEVEMENTS

- **Employee of the Month (May 2024)** – Recognized for outstanding performance and project contributions.
- **Extra Miles Award** – Awarded for successful integration of Asianet into the Vodafone Idea (Vi) application.
- Completed Python certification and solved 200+ DSA problems on LeetCode.
- Delivered and maintained enterprise-grade production mobile applications.
